01 — SELECTED WORK

Things I've built with intention.

A focused selection of work across AI, real-time
collaboration, SaaS, and content.

Welcome to PluggedIn, The Ultimate recording and media manage Solution.

Say goodbye to missing important points from your online meetings. With PluggedIn, you can effortlessly record, store, and share your virtual meetings with just a few clicks.

Sell Your Used Product! We here to help you.

Ebay Retail is bangladesh one of the best reseller website. Here you can buy & sell your used product. Get supper deal by connect your seller.

[See Categories](#)

Ebay-Retail

A product reselling platform connecting buyers and sellers for secure transactions.

STACK: TypeScript, React, Redux

02 — THE STORY

From textile engineering to the web, I found my craft in code-where **thoughtful interfaces** meet clean, scalable engineering.

I'm Pahlavi, a full-stack developer with more than two years of professional experience. I started programming with C and C++, moved into web development in 2022, and began my professional career in 2024. Since then, I've contributed to products ranging from a multi-category sales and distribution platform to a real-time collaborative whiteboard.

My strength lies in combining thoughtful design with clean, reliable code. I pay attention to every detail, including the rhythm of an interaction, the clarity of a query, and the small decisions that make a product feel polished. I learn quickly, collaborate effectively, and take ownership of what I build.

03 — CAPABILITIES

The stack I reach for.

Building delightful interfaces

JavaScript TypeScript React Next.js Redux Zustand Tailwind CSS Motion

APIs & servers

Node.js NestJS RabbitMQ Express.js LangChain Socket.IO

Data layer

PostgreSQL MongoDB Redis Prisma Drizzle Mongoose

Ship faster, deploy safer

Git Docker CI/CD Nginx Traefik VPS AWS CloudFlare

// CORE PROFICIENCY

FRONTEND 92% BACKEND 86% DEVOPS 78%

04 — TRAJECTORY

Where I've honed my craft.

MAR 2024 - PRESENT
Dhaka, Bangladesh

Software Engineer Kodevio Limited

Worked on CeleBrease, a subscription-based rental platform for holiday and event décor. Developed subscription plans, cart flows, and complex order lifecycles, and built backend services for physical inventory tracking, curated kits, and return inspections. Integrated Stripe for recurring subscriptions, one-time rentals, and security deposit handling. Also contributed to Quickfix, an on-demand home-services marketplace connecting users with verified professionals. Developed customer, provider, and admin interfaces, along with service-booking, provider-scheduling, and notification workflows. Integrated Stripe for checkout and payouts and Socket.IO for real-time messaging.

TypeScript React Next.js NestJS PostgreSQL Prisma Tailwind CSS Redis Stripe Socket.IO

AUG 2024 - JUL 2025
Dhaka, Bangladesh

Software Engineer

Manush Technologies Ltd

Worked on a multi-category FMCG sales and distribution platform built for Agami Limited. Developed configurable promotion modules, real-time KPI dashboards, and sales-tracking features. Built Excel reports tailored to business requirements and an automated email scheduling system. Optimized complex SQL queries to efficiently process large datasets and created a bulk-upload feature capable of processing up to 100,000 records in a single operation. Also developed reusable UI components and REST APIs in collaboration with cross-platform teams.

Full-Stack Development SQL Optimization Dynamic Reporting React Redux Node.js NestJS RabbitMQ PostgreSQL Prisma

JAN 2024 - JUN 2024
Khulna, Bangladesh

Junior Software Engineer

Neutron Limited

Worked on two web products: a POS application and an e-commerce platform for herbal products. Converted Figma designs into pixel-accurate UI components for the POS application and implemented JWT-based authentication with role-based access control. Developed a responsive, full-stack e-commerce platform with smooth animations using Motion. Built product and inventory management features with full CRUD functionality and collaborated with senior developers during Agile sprints to deliver features on time.

Frontend Development Backend Development POS System React Next.js Motion Node.js Express.js Monorepo Architecture UI Animations

// EDUCATION

MAR 2020 - NOV 2025

B.Sc. in Textile Engineering

Barishal Textile Engineering College

Specialized in Yarn Engineering.

APR 2024 - DEC 2024

CSE Fundamentals

Phitron

Completed a comprehensive program covering computer science fundamentals and problem-solving with C and C++. Studied programming concepts, recursion, object-oriented programming, data structures, searching, sorting, dynamic programming, and graph algorithms. Strengthened coding...

C C++ DSA OOP Algorithms Dynamic Programming

APR 2023 - NOV 2023

Full-Stack Web Development

Programming Hero

Completed an advanced full-stack web development program covering TypeScript, Next.js, MongoDB, PostgreSQL, Prisma, Docker, AWS, and GraphQL. Built 10 projects, including two backend APIs and three full-stack applications. Gained practical experience with clean architecture, Redux, Vitest,...

TypeScript Next.js MongoDB PostgreSQL Docker AWS

JUN 2022 - DEC 2022

Web Development

Programming Hero

Completed a foundational web development program covering frontend and backend technologies. Built 12 projects, including three full-stack applications, using HTML, CSS, JavaScript, React, Node.js, Express, MongoDB, and Firebase. Also gained experience with responsive design, Git, Firebase...

JavaScript React Firebase Node.js Express.js MongoDB

05 — CONTACT

Let's build something.

I reply within a couple of hours. Tell me what you're building.
